I have interviewed via recruiters with Cognizant for two interviews that were for UI Developer Consultant roles on contract. The interviewers seem to have some sort of sheet in front of them because they dont themselves really know much, but just ask random semi-related to UI questions one-after-the-other, non-stop for about 30 minutes.

The UI developer makes everything on the site is user-friendly and looks good. Q: What kind of skills do you think are crucial for a successful UI developer? A: UI developers must have skills in visual design (including animation and interactive elements), prototyping platforms, copywriting, SEO, site analytics, and front-end frameworks. A good UI developer knows HTML, CSS, and—though it's not mandatory—Photoshop.
