On the following video  
I'm showing how you  
can create DataSnap  
REST Server in Delphi,  
expose server methods  
and call them from an  
Android application.  
The video shows all the  
steps to create the server  
and the Android  
application. This is a

~~With Delphi Datasnap  
Server~~

Once the data module generates a Datasnap connection, it creates a DBXConnection that establishes a tunnel between the DataSnap server and the client.

Closing the TSQLConnection also closes the DBXConnection and breaks the tunnel. This

# Get Free Connecting

tunnel will not be re-established if you open a connection again.

## ~~Connecting the Client to DataSnap Server - RAD Studio~~

I wrote an Android application that uses DataSnap with Mobile connectors to communicate with a delphi server. The application works

# Get Free Connecting

without problems if imposed as a target platform Android-10 (ver. 2.3.3), Instead, if I get over this version does not work anymore, While debugging, I think I saw an exception about a null pointer inside the Java code generated by delphi.
