# Access Free Surfactants And and applications

Garti et al. were the first to demonstrate that hydrophobic polymeric surfactant such as polysiloxane, cetyldimethicone copolyol (Abil EM 90) and poly-glycerol-poly-ricinolate (PGPR) [19, 90, 93-97 and 101] improve double emulsions stability in several independent

# Access Free Surfactants And

cases using different oils and various hydrophilic surfactants (Fig. 17).

The hydrophobic polymers stabilized the inner droplets and formed submicronal droplets while the hydrophilic surfactants stabilized the external interfaces.
